Young Man Whose Father Is General Manager of East Side Railway System Wants to Work on Merit Basis.

Prom President of a literary society to motorman on the Intramurel Railway at the World's Pair grounds, is a step taken by Deles Haynes, a popular East Side young man, who is anxious to follow in the feetsteps of his father and learn the railroad business by experience at the brake.

Young Haynes is the son of L. C. Haynes, vice president and general man-

Last February Delos was graduated from the St. Louis High School with honors. He was president of the Boys' Literary Society, besides bearing the title of chairmen of the Interscholastic Debating League. Although but 17 years old, he has a good physique and a penchant for work, which prompted him to at once begin to build his fortune.

He went to work in the offices of his father. There he was dissatisfied. Everybody made it eary for him, he says, be-cause he was "the son of the boss."

So he decided to make a change. He wished to learn the railroad business from the very bottom rung, but if he took charge of a car on one of his father's lines, he figured, it would be the same old story.

The Intramural Railway at the World's Fair offered him the opportunity he scanted. On that line he could take his ob like any other man and be bossed or ven "fired," if his work was not satisfactory. So he applied for the position. His familiarity with cars stood him in good stead when it came to a test of his ability to run a car, and resulted in his being awarded one of the first cars that toured the Exposition grounds.

Young Haynes intends to stick to his position throughout the Exposition sea-son, when, it is said, his father will have been fully convinced of his worth as a railroad man, and may then give him a position to further test his mettie.

the Marvel of the Change.

Mrs. Dora B. Frazier of No. 140 Althea street. Providence. Rhode Island. Is today the very embodiment of vivacity. She is an energetic forewoman in a large laboratory and shows no traces of her recent long struggle with nervous prostration succeeding typhoid pneumonia.

"My illness began in 1885," says Mrs. Frazier, "and lasted for about three years in all, and for three months I was confined to my bed. I made occasional attempts to work, but I could only manage to put in two or three days out of a week at the very best. Several times I was actually at the point of death.

"I had a good physician, but he could not succeed in getting me out of my week state. It was hard for me to retain any food, and my weight dropped down to seventy-five pounds. I had a great deal of dizziness and suffocating spells. One bof my legs was swollen so as to interfere with my walking. I could get scarcely any sieep, my color was very paie and I auffered from irregularities that are very painful and depressing to women.

"I dragged out month after month of such an existence. Then I read of Dr. Williams' Pink Pills for Pale People in a Providence paper, and I thought I would just try them. Before I got through the first box I said to my mother: Why, thees pills are certainly doing me good. We both grew hopeful and I kept on taking them steadily for six or seven months, and then occasionally for some time longer, and all the time my troubies kept lessening until at last they were gone altogether. I got rid of indigestion, headaches, nervousness, sleeplessness, dragging sensutions and irregularities of every kind and my weight ran up thirty-two pocads. "It is more than a year since I took up my full work, and in all that time I have not lost a day through illness. Dr. Williams' Pink Pills have made me a well woman and i have no lack of strength or cheerful spirits."

'The Secret Is So Simple"

O'Sullivan Heels are full of life because they are made of new rubber.

That is all there is to it. But it means a good deal more in money to its makers than appears on the surface of the heel they make. New rubber costs ten times as much as old rubber that would make the

surface look just the same. There is also a simple way for the buyer to look beneath the surface; by reading the name on the tread

then it is new rubber, the same "Sterling" stands for solid silver. Under any other name it is reclaimed many times that we print it here as a fact founded on experience.

But you are asked to pay just as
